

APBA 2013 Football Season Card Set

The following players comprise the 2013 season APBA Football Player Card Set. The regular starters at each position are listed first and should be used most frequently. Realistic use of the players below will generate statistical results remarkably similar to those from real life.

IMPORTANT: When a Red "K" appears in the R-column as the result on any kind of running play from scrimmage or on any return, roll the dice again, refer to the K-column, and use the number there for the result. When a player has a "K" in his R-column, he can never be used for kicking or punting.

If the symbol "F-K" or "F-P" appears on a players card, it means that you use the K or P column when he recovers a fumble. Players in red are included in the XF set (extra football players).

ARIZONA (74)

|---|---|--|--|

OPTIONAL TIMING RULES: After each team is a number in ()s. This is the team's play rating. In this new system, you add the play rating of each team together and then divide by four to get the plays per quarter. For example, Denver is playing New England. Denver's play rating is 80 and New England's is 81. The play per quarter is 41. $(80 + 81) / 4$. Always round up.

Additional step, if you want, roll two dice and add the result together (a 2-12 result). Consult the following chart to determine the adjustment to the figure calculated above. This dice roll is done before every quarter.

| | | | | | | | | | | | |
|------------|----|----|----|----|---|---|---|---|----|----|----|
| Dice Roll | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| Adjustment | -2 | -2 | -1 | -1 | 0 | 0 | 0 | 1 | 1 | 2 | 2 |

Continuing the Denver New England example, a 5 is rolled. The plays for this quarter would be 40 $(41 - 1)$. This is an optional system to account for the increased number of plays in the current era of football. In no case should the number of plays be less than 30 per quarter.

To determine the play rating for other teams, you calculate the sum of that team's runs, passes, sacks, punts, kickoff returns and field goal attempts. This amount is divided by the number of games played. Always round up.
