This is a pre-play season. You, as the coach, choose your PK kickers. There are no team ratings or clutch points at the start of your tournament.

#### CALCULATING TEAM RATINGS AND CLUTCH POINTS:

Following these steps to compute team ratings and clutch points for your draft league team. These calculations should be done after every two games played in your replay.

**Team Ratings:** Compute team ratings by calculating the percentage total points the team earned over possible points available for both home and away games.

Normally a team earns three points for a win and one point for a draw. If this percentage is 0 to less than 20%, the rating is 1; 20% to less than 40% the rating is 2; 40% to less than 60%, the rating is 3; 60% to less than 80% is 4 and 80 % or greater is 5.

**Team Defensive Rating:** The team defensive rating is the percentage of goals allowed to games played. If the percentage is 0 to less than 20%, the rating is 5; 20% to less than 40% is 4; 40% to less than 60% is 3; 60% to less than 80% is 2 and 80% or higher is 1. Remember these calculations are done for both home and away games. You only take into account the home game results for the home ratings.

**Team Clutch Points:** Calculate clutch point by multiply the percentage used for team ratings by 10 (ten). Round up or down accordingly
